

# 01 Introduction

Team Number: 20

Team Member Names: Joris Neetens, Arno Van der Auwera, Martin Hamon

Team Member r-Numbers: r0991057, r0995002, r0957231

Link to github repo: <https://github.com/martinhamon2/Team-20>

Link to file in Github Repo with the README.md for running the application:

<https://github.com/martinhamon2/Team-20/blob/main/README.md>

Describe the application and its functionalities (summary):

*A little application for managing amusement parks, can be used to look up information about various amusement parks and attractions. It has an admin panel where you can manage the parks and attractions, for example change their status, name, and the spare part needed for repairs.*

List the technologies and frameworks used for front- as well as back-end (bullet points):

Frontend: React, next.js

Backend: Springboot, Maven

In the following table, fill in the first names of the respective roles that have been taken (if not sure, leave blank, but it needs to be clear in the final report):

| Topic                            | Blue 1 | Blue 2 | Red    |
|----------------------------------|--------|--------|--------|
| Cryptography                     | Arno   | Joris  | Martin |
| Injectons                        | Arno   | Martin | Joris  |
| Vulnerable & Outdated Components | Arno   | Joris  | Martin |
| Authentication & Sessions        | Joris  | Martin | Arno   |
| Authorization                    | Joris  | Martin | Arno   |
| Secure CI / CD                   | Arno   | Martin | Joris  |
| Logging & Monitoring             | Arno   | Joris  | Martin |
| SSRF & Clickjacking              | Martin | Joris  | Arno   |
